

CLAIMS

What is claimed is:

1. A system, comprising:
a screen based display system including at least a substrate; and
a detachable printing apparatus to execute printing and deletion commands.
2. The system of claim 1, further comprising a server to configure printing and deletion commands for said printing apparatus.
3. The system of claim 1, further comprising a server to communicate printing and deletion commands to said display system.
4. The system of claim 1, further comprising a server to communicate printing and deletion commands to said printing apparatus.
5. The system of claim 1, wherein said printing apparatus includes a deletion unit.
6. The deletion unit of claim 5, comprising a toner-collecting unit.
7. The system of claim 1, wherein said printing apparatus verifies the identity of said display system.
8. The system of claim 1, wherein said screen based display system includes a first attachment mechanism, said printing apparatus includes a second attachment mechanism, said first and second attachment mechanisms capable of being mated.
9. A printing apparatus comprising:
a printing mechanism;
a deletion mechanism; and
a registration mechanism, to attach the printing apparatus to a display system.
10. The printing apparatus of claim 9, comprising a controller.
11. The printing apparatus of claim 9, comprising a communication unit, to communicate with said display system.

12. The printing apparatus of claim 9, comprising a communication unit, to communicate with a server.
13. The printing apparatus of claim 9, comprising an identifying mechanism.
14. The printing apparatus of claim 9, comprising a toner collecting mechanism.
15. A printable display system comprising:
 - a display window;
 - a printing substrate; and
 - a registration mechanism to connect the display system to a detachable printing apparatus.
16. The display system of claim 15, comprising guiding rollers to enable said printing substrate to be positioned adjacent to printing and deleting mechanisms of said detachable printing apparatus.
17. The display system of claim 15, comprising a communication unit.
18. The display system of claim 15, comprising a controller.
19. The display system of claim 15, comprising an identifying mechanism.
20. The display system of claim 15, further comprising auxiliary rollers and slides.
21. A method for printing and erasing screen based images, comprising:
 - attaching a detachable printing apparatus to a display system;
 - registering said detachable printing apparatus with said display system; and
 - executing a set of print commands.
22. The method of claim 21, comprising identifying said display system to said printing apparatus.
23. The method of claim 21, comprising:
 - configuring printing commands in a server; and
 - communicating said commands to at least one detachable printing apparatus.
24. The method of claim 21, comprising deleting a previous image.

25. The method of claim 21, comprising collecting deleted toner.
